

PYROTHERM CS 110

Infrared calibration source/black body

Overview

Description

The infrared calibration sources PYROTHERM CS 110 is well suited for calibration and examination of infrared radiation thermometers and infrared cameras in the temperature range from -15°C to 110°C .

A serial interface RS-485 (optional USB adapter) enables the control of the black body with PC. Digital PID controller and precision platinum resistance thermometer Pt100 provide excellent accuracy and stability. Optional dry air or nitrogen flushing unit reduces condensation at low operating temperatures.
